Cathy received the technical response today. Apparently it was the guidance document Eva attached to her comments on the particle tracking that was too big

Carolyn-

The file with "Davis" in the title contains Dan Pope's comments. I am sending this back so you know which files I received. Thank you.

Cathy

Cathy

I just tried to send you this email with attachments and it bounced back. Will try deleting some attachments and breaking the email into 2 parts to see if it will go through. Here is part 1

Cathy

I was asked to go ahead and send to you this letter providing the technical basis for the joint agency response to Phil's letter so that you will have the scope of the agencies concerns and understand the technical complexity of the problem now to be solved in advance of the letter coming from management. Angeles and Tina will be following with their response once

that letter is signed. Hard copies of attached letter and supporting documentation will be coming in the mail. In addition, I have also included comments received from Eva yesterday on the particle tracking model for the containment system so you have a complete package for discussion at the next BCT. I'll leave it to you to forward to the other participants.

Have a good weekend!

Carolyn d'Almeida
